Learning Targets

- Identify the "Why, Who, What, How, When and Where" of implementing trauma-responsive, cross-system school mental health processes and practices.
- Identify the steps for participation in a District-Community Leadership Team.

Overview

Why	Improve mental health outcomes for children/youth
Who	District-Community Leadership Teams
What	Implement effective, cross-system, school mental health processes and practices
How	School Mental Health Implementation Process and Planning Components
When	Monthly/Bi-Monthly
Where	Onsite and Online

Check for Understanding

Core Principles of Trauma-Responsive School Mental Health Implementation

Ensure	emotional and physical safety
Believe	that healing happens in relationships
View	children/youth holistically
Strive	for cultural competence
Support	choice, control, and empowerment
Understand	trauma and its impact
Use	a collaborative approach

Why: Cross-System Alignment to Improve Outcomes

Increase Efficiency	Increase Effectiveness	Ensure Sustainability
<ul style="list-style-type: none"> <input type="checkbox"/> Integrate processes, practices, and resources <input type="checkbox"/> Utilize cross-training and learning to enhance coordination of support <input type="checkbox"/> Align with existing district and community improvement efforts (i.e. Board goals and the Kansas Education Systems Accreditation) 	<ul style="list-style-type: none"> <input type="checkbox"/> Improve collaboration <input type="checkbox"/> Make decisions informed by both district and community data <input type="checkbox"/> Establish fidelity and progress monitoring measures across settings <input type="checkbox"/> Align implementation of evidence- and research-based practices <input type="checkbox"/> Establish a cohesive continuum of support with ongoing refinement via a self-correcting feedback loop 	<ul style="list-style-type: none"> <input type="checkbox"/> Establish a cross-system infrastructure, continuity of policies, practices, and common language <input type="checkbox"/> Develop plans to address competencies and capacity to facilitate implementation <input type="checkbox"/> Clearly defined roles and processes for school- and community-employed mental health providers

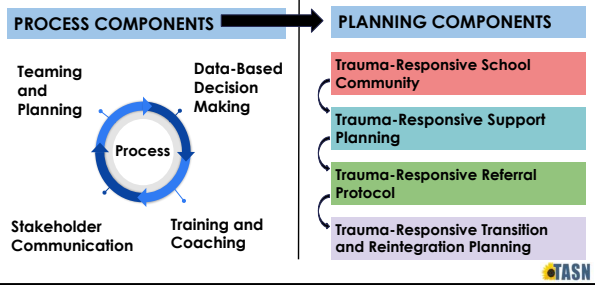

Who: District-Community Leadership Team Members

	EXECUTIVE-LEVEL LEADERSHIP	DISTRICT/COMMUNITY IMPLEMENTATION COACHES	BUILDING/ORGANIZATION IMPLEMENTATION COACHES
Position	CMHC <ul style="list-style-type: none"> <input type="checkbox"/> Executive Director or Designee <input type="checkbox"/> Community-Based Service Director or Designee District <ul style="list-style-type: none"> <input type="checkbox"/> Superintendent or Designee <input type="checkbox"/> Special Education Director or Designee 	CMHC <ul style="list-style-type: none"> <input type="checkbox"/> Community-Based Service Provider; Clinical Director District <ul style="list-style-type: none"> <input type="checkbox"/> School Social Worker, School Psychologist, School Counselor, Behavior Specialist 	CMHC <ul style="list-style-type: none"> <input type="checkbox"/> School-based social worker, case manager, other District <ul style="list-style-type: none"> <input type="checkbox"/> School Social Worker, School Psychologist, School Counselor, Behavior Specialist
Role	Establish an enabling context for the implementation and sustainability of district-community school mental health practices via authorization, policy adjustments, and coordination of time and resources.	Implement school-community mental health processes and practices at the district/community level by taking a lead on action item follow up, provision of training and coaching, and coordination of data collection activities. Eventually, facilitate the DCLT without external support.	Under the guidance of District/Community Implementation Coaches, implement school-community mental health processes and practices at the building/organization level by taking a lead on training, coaching, and data collection activities. Provide feedback on application of policies, processes, and practices.

What: Trauma-Responsive Planning Components

Component	Description
Trauma-Responsive School Community	School community is trauma-informed and has trauma-responsive goals, plans, policies, protocols, processes, practices, and resources.
Trauma-Responsive Support Planning	Support is collaboratively determined and monitored with all relevant stakeholders, including children/youth and caregivers.
Trauma-Responsive Referral Protocol	Referral protocol addresses a continuum of mental health supports for children/youth, including referrals to partnering organization(s) when appropriate.
Trauma-Responsive Transition and Reintegration Planning	Protocol for transition from alternative settings, including a psychiatric residential treatment facility.

How: Trauma-Responsive Process and Planning Components

Phased Implementation

Exploration	Installation	Initial Implementation	Full Implementation	Innovation and Sustainability
Willingness, demonstrated by participation in exploration meetings.	Commitment, evidenced by agreement to participate.	Change, evidenced by implementation activities.	Fidelity and outcomes, evidenced by process fidelity and outcomes data.	Regular review and adjustments, evidenced by implementation activities, fidelity, and outcome data.

TASN

Data Collection Activities				TASN
Gathered From	Measure	Description	Timeline	
District and Partnering Organization	Implementation Guide Rubric and District-Community Leadership Team Documents	An implementation guide is utilized to support District-Community Leadership Teams through the development and implementation of effective school mental health processes and practices and assess progress.	Each District-Community Leadership Team Meeting	
	Individual Progress Monitoring Data	District-Community Leadership Teams share non-identifiable support and progress monitoring data with the School Mental Health Initiative to inform the effectiveness of cross-system learning to improve outcomes for children/youth.	Semi-Annually	
	Coaching Feedback	District-Community Leadership Teams are asked to provide quantitative and qualitative feedback on the depth and usefulness of the coaching and support provided by the School Mental Health Initiative to inform any needed adjustments.	Annually	
District	Family Engagement Survey	District/buildings collect feedback from families regarding perceptions of engagement to inform family engagement planning and practices that result in shared decision making and deep collaboration.	Annually	
	Student School Culture Survey	District/buildings collect aggregated, non-identifiable feedback from children/youth to determine the overall degree to which they feel safe, supported, and connected at school.	Annually	
	Inclusive MTSS Implementation Scale (IMIS)	Completed by all instructional staff and administrators. This scale provides school-level data on core and intervention implementation in reading, math, behavior, and social-emotional development.	Annually	
	Inclusive MTSS Implementation Scale: SMH Supplement	District/buildings collect responses to supplemental questions within the Inclusive MTSS Implementation Scale from instructional staff and administrators. Responses measure social validity, personal implementation, and administrator support and are used by the cross-system team to gauge progress, inform practice profile ratings, and inform action planning.	Annually	
Partnering Organization	Community Implementation Scale	Community partner(s) complete a brief implementation scale that helps to identify strengths, beliefs, and areas to target for improved cross-system collaboration. This measure complements the Inclusive MTSS Implementation Scale: SMH Supplement that the partnering district is asked to complete.	Annually

Health is a continuous process. © 2018 TASN

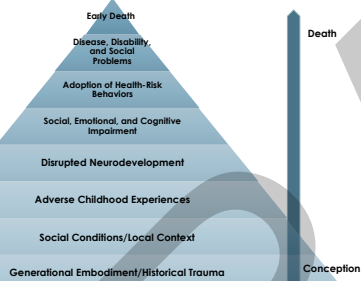

Learning Target

Articulate the need for trauma-responsive, cross-system school mental health processes and practices.

Adverse Childhood Experiences Study

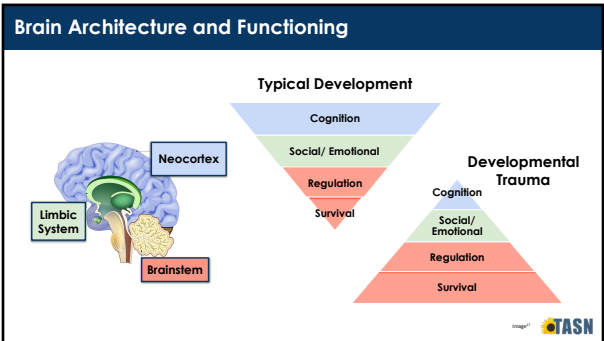

Materials developed by CDC.*

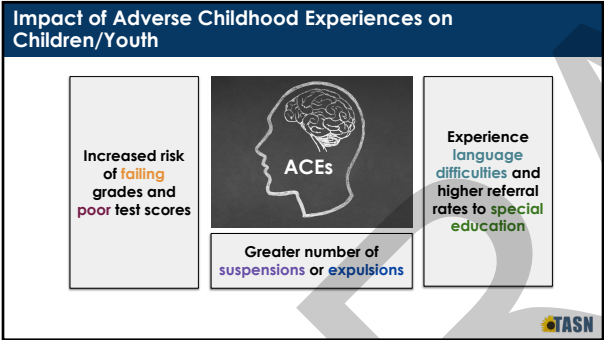

*Materials adapted from CDC-Kaiser ACE Study: Guidelines for Disease Control and Prevention. (n.d.). About the CDC-Kaiser ACE Study. [https://www.cdc.gov/ncjrs/ceas/acestudy/about.htm]

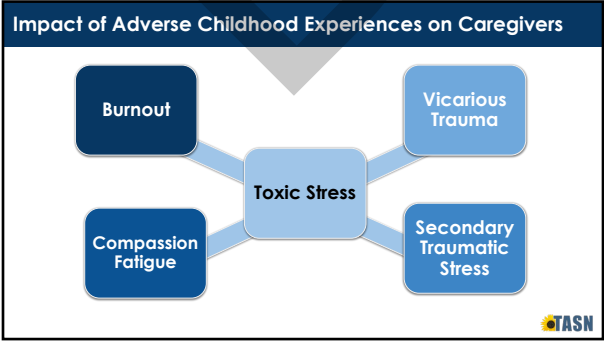

Kansas Adverse Childhood Experiences Study

Schools: The De Facto Mental Health System

20% of children and youth have a clearly identified need for mental health services but **only about one-third** of these children/youth receive any help at all.

For children/youth who do receive any type of mental health service, over **70%** receive the service from their school.

Addressing Mental Health In Kansas School Communities

Barriers identified in addressing student mental health

- Consistency in services
- Relationships with families
- Little mental health training
- Stigma
- Access to services

84% of educators agreed or strongly agreed that further professional development training is needed

- Mental health disorders
- Behavioral management techniques
- Specialized skill training
- PBIS
- Trauma

School Mental Health Defined

All aspects of social-emotional development, including mental health, mental illness, substance abuse, and the impact of ACEs/trauma.

Practices that support the emotional well-being of all children/youth, including those at risk of and/or with mental health challenges.

Supports (and the coordination thereof) provided by both school and community mental health professionals to address barriers to learning.

**Treatment
Access and
Outcomes**

Children/youth are **6X** more likely to complete evidence-based treatment when it's provided in schools than other community settings.

Trauma-Responsive Principles

- Ensure** emotional and physical safety
- Believe** that healing happens in relationships
- View** children/youth holistically
- Strive** for cultural competence
- Support** choice, control, and empowerment
- Understand** trauma and its impact
- Use** a collaborative approach

**Check for
Understanding**

Conclusion

Articulate the need for trauma-responsive, cross-system school mental health process and practices.

Alignment of Cross-System, School Mental Health Processes and Practices

Learning Target

Identify the building blocks around which systems might align to improve mental health outcomes for children/youth.

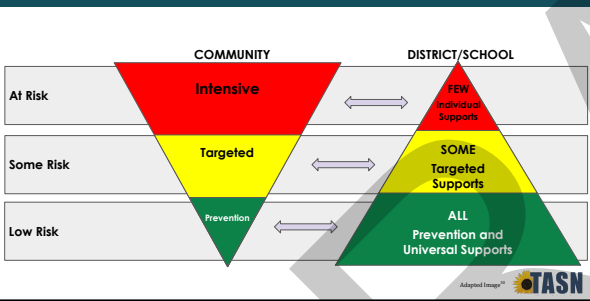

Check for Understanding

Where and How to Begin Aligning System Efforts

Effective Implementation

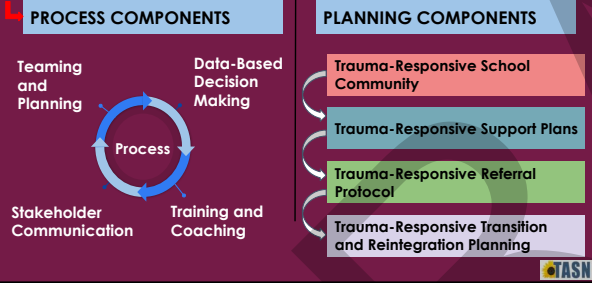

Conclusion

Identify the building blocks around which systems might align to improve mental health outcomes for children/youth.

Overview of the School Mental Health Implementation Process Components

Learning Target

Describe the application of the School Mental Health Implementation Process.

Core Principles of the School Mental Health Implementation Process

- Ensure** emotional and physical safety
- Believe** that healing happens in relationships
- View** children/youth holistically
- Strive** for cultural competence
- Support** choice, control, and empowerment
- Understand** trauma and its impact
- Use** a collaborative approach

Implementation Process Components Defined

Teaming and Planning

Leadership from education and partnering organization(s) regularly meet to review/address policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

Data-Based Decision Making

District, school, community, and caregiver engagement data are utilized to inform cross-system goals and plans, policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

Training and Coaching

Coaches from education and partnering organization(s) collaborate to align and facilitate the implementation of goals, plans, policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

Stakeholder Communication

Goals, plans, policies, protocols, processes, practices, and resources are documented and communicated to stakeholders, including children/youth and caregivers.

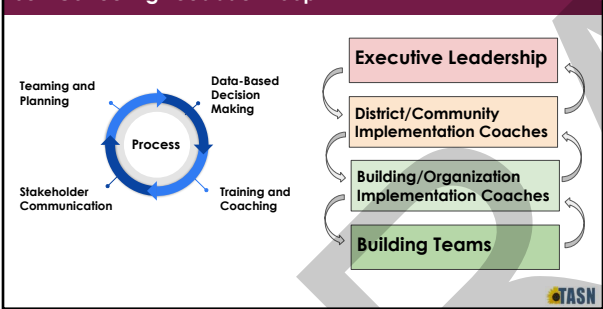

Trauma-Responsive Planning Components

Component	Description
Trauma-Responsive School Community	School community is trauma-informed and has trauma-responsive goals, plans, policies, protocols, processes, practices, and resources.
Trauma-Responsive Support Planning	Support is collaboratively determined and monitored with all relevant stakeholders, including children/youth and caregivers.
Trauma-Responsive Referral Protocol	Referral protocol addresses a continuum of mental health supports for children/youth, including referrals to partnering organization(s) when appropriate.
Trauma-Responsive Transition and Reintegration Planning	Protocol for transition from alternative settings, including a psychiatric residential treatment facility.

Implementation Process and Planning Application

Phase	Exploration	Installation	Initial Implementation	Full Implementation	Sustainability and Innovation
Description	Willingness , demonstrated by participation in exploration meetings.	Commitment , evidenced by agreement to participate.	Change , evidenced by implementation activities.	Fidelity and outcomes , evidenced by process fidelity and outcomes data.	Regular review and adjustments , evidenced by implementation activities, fidelity, and outcome data.
Application Questions	<p>What practices, policies, or resources are in place? Needed? (Teaming and Planning)</p> <p>What data points are being utilized? Could be utilized? (Data-Based Decision Making)</p> <p>What supports are in place provided? Needed and how they will be provided? (Training and Coaching)</p> <p>What is communicated? Needs to be communicated? (Stakeholder Communication)</p>				
SMART GOAL					
Specific - What will be done and who will do it.					
Measurable - How the action will be measured.					
Attainable - Realities faced within the community.					
Relevant - Fit with the purpose, culture and structure of the community, and addresses the vision for outcomes.					
Time-Bound - Outlines a specific timeline.					
ACTION PLAN AND PROGRESS MONITORING LOG					
Who	What	When	Outcome		

Self-Correcting Feedback Loop

Check for Understanding

Conclusion

Describe the application of the School Mental Health Implementation Process.

Teaming and Planning Process Component

PROCESS COMPONENTS

Teaming and Planning

Data-Based Decision Making

Stakeholder Communication

Training and Coaching

PLANNING COMPONENTS

Trauma-Responsive School Community

Trauma-Responsive Support Plans

Trauma-Responsive Referral Protocol

Trauma-Responsive Transition and Reintegration Planning

Learning Targets

- Define "Teaming and Planning".
- Outline membership roles and responsibilities.
- Identify how to establish a meeting schedule and set a planning agenda.

Core Principles of Teaming and Planning

- Ensure** emotional and physical safety
- Believe** that healing happens in relationships
- View** children/youth holistically
- Strive** for cultural competence
- Support** choice, control, and empowerment
- Understand** trauma and its impact
- Use** a collaborative approach

Definition of Teaming and Planning

Leadership from education and partnering organization(s) regularly come together to review and address goals, plans, policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

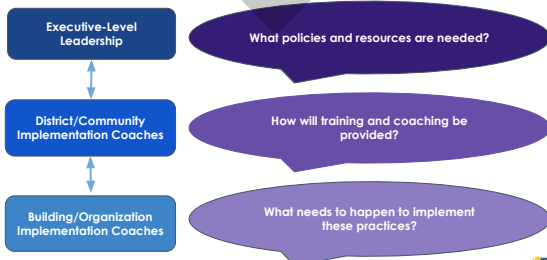

Phase	Exploration	Installation	Initial Implementation	Full Implementation	Sustainability and Innovation
Description	Willingness, demonstrated by participation in exploration meetings.	Commitment, evidenced by agreement to participate.	Change, evidenced by implementation activities.	Fidelity and outcomes, evidenced by process fidelity and outcomes data.	Regular review and adjustments, evidenced by implementation activities, fidelity, and outcome data.

District-Community Leadership Teams:

- Establish a meeting schedule and meeting format/location.
- Establish clearly defined roles and responsibilities.
- Attend and actively participate in all meetings.
- Utilize a structured meeting agenda.
- Utilize a shared electronic platform for collaborative activities.

Roles and Responsibilities

Schedules and Agendas

Date	Time	Training Location	Participants
September 21, 2021	8:30 AM - 11:30 AM	In person - Centralized	DCLT
October 5, 2021	10:00 AM - 11:30 AM	Online via Zoom	DCLT Coaches
November 2, 2021	8:30 AM - 11:30 AM	In person - Centralized	DCLT
November 16, 2021	10:00 AM - 11:30 AM	Online via Zoom	DCLT Coaches
January 25, 2022	8:30 AM - 11:30 AM	In person - Centralized Location	DCLT
February 8, 2022	10:00 AM - 11:30 AM	Online via Zoom	DCLT Coaches
March 1, 2022	8:30 AM - 11:30 AM	In person - Centralized Location	DCLT
March 22, 2022	10:00 AM - 11:30 AM	Online via Zoom	DCLT Coaches
April 24, 2022	8:30 AM - 11:30 AM	In person - Centralized Location	DCLT

DESCRIPTION: Review the overarching objectives of the School Mental Health Professional Development and Coaching System:

MEETING OBJECTIVES:

- ❑ Identify the key principles of a trauma responsive school community
- ❑ Articulate a SMART goal for installing trauma responsive school community

GENERAL AGENDA:

- ❑ Review meeting objectives
- ❑ Trauma Responsive School Community
- ❑ SMART goal
- ❑ Next steps/Action Items

HANDOUTS/ATTACHMENTS:

- ❑ Trauma Responsive School Community Facilitation Guide
- ❑ Moodle Users Guide

WHAT TO BRING-/HOW TO PREPARE:

- ❑ Computer
- ❑ Consider: Your system's previous experience and definition of "Trauma-Responsive"
- ❑ Prepare any stakeholder feedback received

Check for Understanding

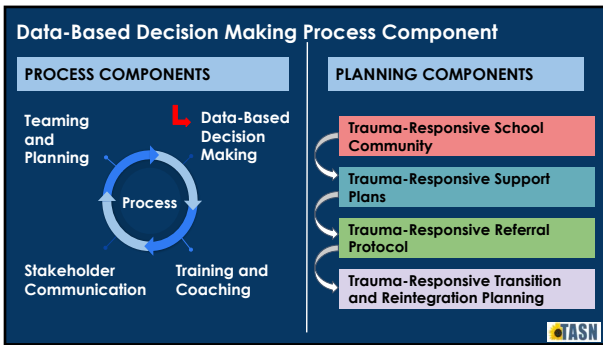

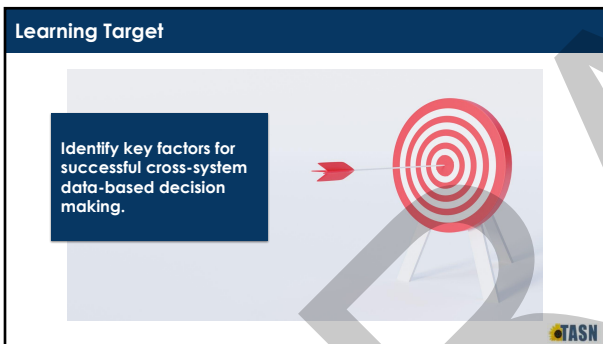

Conclusion

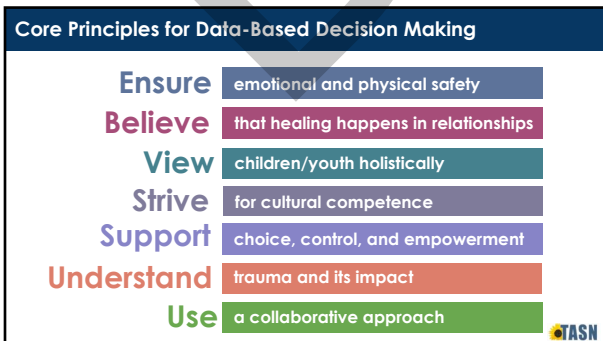

- ❑ Define "Teaming and Planning".
- ❑ Outline membership roles and responsibilities.
- ❑ Identify how to establish a meeting schedule and set a planning agenda.

Definition of the Data-Based Decision-Making Process Component

Review of district, school, community, and caregiver engagement data to inform cross-system goals and plans, policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

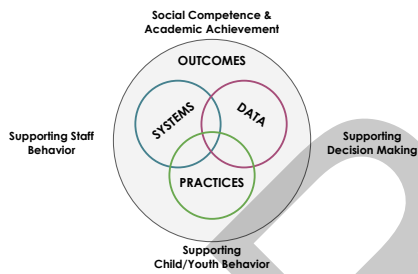

Phase	Exploration	Installation	Initial Implementation	Full Implementation	Sustainability and Innovation
Description	Willingness, demonstrated by participation in exploration meetings.	Commitment, evidenced by agreement to participate.	Change, evidenced by implementation activities.	Fidelity and outcomes, evidenced by process fidelity and outcomes data.	Regular review and adjustments, evidenced by implementation activities, fidelity and outcome data.

Data collection activities are:

- Clear – Directly informs planning and outcomes.
- Appropriate – Accurately informs concerns and supports.
- Comprehensive – Provides a view of the whole child/youth.
- Flexible – Is adjusted based upon relevant measures and reviews.
- Feasible – Is manageable to collect and utilize in a meaningful way.

Clear Data-Based Decision Making

Appropriate Data-Based Decision Making

Comprehensive Data-Based Decision Making

Simply gaining access to SMH programs, however, is an insufficient metric of effectiveness and systems must move from access to outcomes as their determining measurement of impact.

Flexible Data-Based Decision Making

Feasible Data-Based Decision Making

CMHC Data (Analytical)		District Baseline (Analytical)	
<ul style="list-style-type: none"> <input type="checkbox"/> Adverse Childhood Experiences (ACEs) <input type="checkbox"/> Child and Adolescent Functional Assessment Scale (CAFAS) 	<ul style="list-style-type: none"> <input type="checkbox"/> Child Behavior Checklist (CBCL) <input type="checkbox"/> Diagnosis <input type="checkbox"/> Gene testing <input type="checkbox"/> Psych evaluation 	<ul style="list-style-type: none"> <input type="checkbox"/> Achievement scores <input type="checkbox"/> Diagnostic Assessments (such as Behavior Assessment System for Children - BASC (Parent & Teacher) 	<ul style="list-style-type: none"> <input type="checkbox"/> Woodcock-Johnson (WJ-IV) <input type="checkbox"/> IQ/cognitive testing <input type="checkbox"/> Universal Screener (such as SAEBRS, SRSS-IE, etc.)
CMHC Progress Monitoring		District Progress Monitoring

Check for Understanding

Conclusion

Identify key factors for successful cross-system data-based decision making.

Training and Coaching Process Component

PROCESS COMPONENTS	PLANNING COMPONENTS
Teaming and Planning  Stakeholder Communication Training and Coaching	<ul style="list-style-type: none"> Trauma-Responsive School Community Trauma-Responsive Support Plans Trauma-Responsive Referral Protocol Trauma-Responsive Transition and Reintegration Planning

Learning Targets

- ❑ Identify drivers essential for successful school mental health implementation.
- ❑ Articulate the role of the District-Community Leadership Team in building capacity to scale implementation.
- ❑ Define implementation and intervention fidelity.
- ❑ Identify an implementation quotient to measure system level implementation fidelity.

TASN

Core Principles for Training and Coaching

- Ensure** emotional and physical safety
- Believe** that healing happens in relationships
- View** children/youth holistically
- Strive** for cultural competence
- Support** choice, control, and empowerment
- Understand** trauma and its impact
- Use** a collaborative approach

TASN

Definition of the Training and Coaching Component

Coaches from education and partnering organization(s) collaborate to align and facilitate the implementation of goals, plans, policies, protocols, processes, practices, and resources within the school community to improve mental health outcomes.

Phase	Exploration	Installation	Initial Implementation	Full Implementation	Sustainability and Innovation
Description	Willingness, demonstrated by participation in exploration meetings.	Commitment, evidenced by agreement to participate.	Change, evidenced by implementation activities.	Fidelity and outcomes, evidenced by process fidelity and outcomes data.	Regular review and adjustments, evidenced by implementation activities, fidelity, and outcome data.

"Implementation drivers" include:

- ❑ Competency – Provide system and individual training/coaching for implementation (e.g., cross-system processes, trauma-responsive, practices, etc.) to develop capacity at all district/organization levels.
- ❑ Organization – Develop/establish systems-level structures and processes that provide an enabling environment for implementation.
- ❑ Leadership – Utilize a District-Community Leadership Team to resolve adaptive (e.g., identify needs; measure progress toward goals) and technical issues (e.g., time) that arise throughout all stages of implementation.

Scaling Implementation

Adapted English™

Implementation Fidelity

Implementation Quotient Fidelity Measure

Assesses systems level implementation and fidelity in order to develop action items for achieving fidelity across all professionals intended to utilize the process/practice.

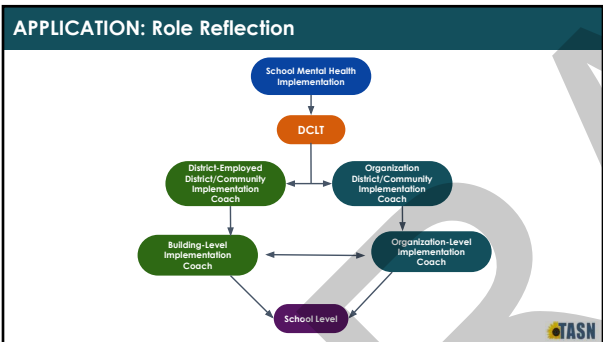

Process	Description	Example
Outline Assessment System	How many staff are expected to use a particular practice? (N)	10
	What is the fidelity criteria?	Observation form and survey
	What two periods will be used for assigning staff scores?	October and March
Assign Staff Scores	0 = Staff position vacant	2
	1 = Staff untrained	2
	2 = Staff completed initial training	2
	3 = Staff trained and receives weekly coaching	3
	4 = Staff met fidelity criteria in the previous monitoring period	3
	5 = Staff met fidelity criteria previously in 2 of 3 previous monitoring periods	4
Add the scores together for all staff	Staff Sum = ____	28
Divide the Staff Sum by the Total Sum	Staff Sum (X) / Total Staff (N) = Implementation Quotient	28/10 = 2.8

Check for Understanding

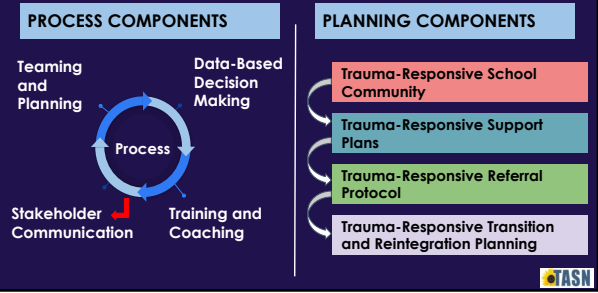

Conclusion

- ❑ Identify drivers essential for successful school mental health implementation.
- ❑ Articulate the role of the District-Community Leadership Team in building capacity to scale implementation.
- ❑ Define implementation and intervention fidelity.
- ❑ Identify an implementation quotient to measure system level implementation fidelity.

Stakeholder Communication Process Component

Learning Target

Identify an effective process for communicating school mental health implementation efforts with stakeholders.

A graphic of a target with a red arrow hitting the bullseye is positioned to the right of the text box. A small "TASN" logo is in the bottom right corner of the graphic.

Core Principles of Stakeholder Communication

Ensure	emotional and physical safety
Believe	that healing happens in relationships
View	children/youth holistically
Strive	for cultural competence
Support	choice, control, and empowerment
Understand	trauma and its impact
Use	a collaborative approach

A small "TASN" logo is in the bottom right corner of the graphic.

Definition of the Stakeholder Communication Process Component

Goals, plans, policies, protocols, processes, practices, and resources to improve mental health outcomes are documented and communicated to stakeholders, including children/youth and caregivers.

Phase	Exploration	Installation	Initial Implementation	Full Implementation	Sustainability and Innovation
Description	Willingness, demonstrated by participation in exploration meetings.	Commitment, evidenced by review and documented planning.	Change, evidenced by policies, protocols, processes, practices, resource allocation, and stakeholder communication practices.	Fidelity and outcomes, measured by process fidelity and documented outcomes.	Regular review and adjustments, evidenced by documentation and outcomes.

District-Community Leadership Teams:

- Assess the communication need
- Prioritize the audience(s) to be reached
- Determine desired outcome of message
- Develop the message(s)
- Identify methods for conveying message(s)
- Establish specific outreach activities and timeline^{43,44,45}

Assess Communication Need

Prioritize Stakeholders

Determine Desired Outcome

Develop the Message

CORE STATEMENT: Message mapping will assist District-Community Leadership Teams to develop an effective communication strategy to engage stakeholders.

<p>KEY MESSAGE 1: Clear goals of the outlet of communication planning ensures that the time and resources are well spent.</p> <p>SUPPORT POINTS</p> <ol style="list-style-type: none"> Examples of clear communications goals: <ol style="list-style-type: none"> Persuade parents to support a particular district or school event. Demonstrate the importance of child/youth mental health to staff. Connect mental health and "hot topic" education issues such as employee retention and staff well-being. If seeking to demonstrate the importance of mental health, DCLTs may, for example, review their district's/agencies mission statements and inform stakeholders about the work taking place. The goal setting process can help to establish clarity on an issue or the purpose of a new policy and practice. 	<p>KEY MESSAGE 2: Media coverage, exposure, and social media platforms can be vehicles for reaching key stakeholders.</p> <p>SUPPORT POINTS</p> <ol style="list-style-type: none"> The media is not a target audience. Individual bloggers and opinion writers are thought leaders in their own right and, depending on DCLT goals, should be included as target audiences in outreach plans. Specific outlet's geographic reach, circulation, and demographics in light of its alignment with identified stakeholders should be considered. 	<p>KEY MESSAGE 3: Track outreach results to determine whether progress towards goals of the communications plan are made.</p> <p>SUPPORT POINTS</p> <ol style="list-style-type: none"> Different ways to measure the success of communications efforts include the number of views, published stories, followers, and shares. Identify key metrics for the initiative and monitor them appropriate to the length of the outreach effort. Through regular review, DCLTs will be able to get a sense of which activities are most effective and adjust the strategy as needed.
---	---	---

Identify Methods for Conveying the Message

Establish Specific Outreach Activities and Timeline

Presentation to School Board on Supporting Collaboration with Community Mental Health Center on School-Based Mental Health Services		
Action Items	Due Date	Responsibility
Draft and send letter to Board Chair asking for time to present at next Board meeting	April 15	James
Meet with evaluator to gather data on success of school-based mental health services	March 1	James
Draft and ensure adoption of messages to be presented to Board	March 5	James
Select three stakeholders for presentation (e.g., home caregiver, community partner, and project director)	March 8	Jane
Develop a PowerPoint for use by project director	March 12	John
Draft 4-minute presentations by home caregiver and community partner	March 20	Jane
Arrange for stakeholder rehearsals	March 21	John
Prepare packet of "leave behind" materials for board	March 22	Joan
Send out invitations to home caregivers of children/youth to attend	March 29	Jane
Communicate with School Board office on logistics for presentation day	April 2	John
Ensure transportation to presentation site for stakeholders and selected invitees	April 11	Joan

DRAFT

APPLICATION: Message Mapping

Goal: Establish a District-Community Leadership Team to Implement cross-system School Mental Health Processes and Practices				
Who do you want to reach?	What do you want to achieve?	What do you want to say?	How will you say this?	How will you follow up?
Children/Youth				
Home Caregivers				
Classified Staff				
Certified Staff				
Community Members				
Organization Staff				
Administrators				
Board of Education or Governing Board				

Conclusion

Identify an effective process for communicating school mental health implementation efforts with stakeholders.

Overview of the School Mental Health Implementation Planning Components

PROCESS COMPONENTS

Teaming and Planning

Data-Based Decision Making

Stakeholder Communication

Training and Coaching

PLANNING COMPONENTS

Trauma-Responsive School Community

Trauma-Responsive Support Plans

Trauma-Responsive Referral Protocol

Trauma-Responsive Transition and Reintegration Planning

Learning Target

Describe the components around which District-Community Leadership Teams initially plan, using the implementation process.

Core Principles of School Mental Health Implementation Planning

Ensure	emotional and physical safety
Believe	that healing happens in relationships
View	children/youth holistically
Strive	for cultural competence
Support	choice, control, and empowerment
Understand	trauma and its impact
Use	a collaborative approach

Definition of Implementation Planning Components

PLANNING COMPONENTS

Trauma-Responsive School Community	School community is trauma-informed and has trauma-responsive goals, plans, policies, protocols, processes, practices, and resources in place.
Trauma-Responsive Support Plans	Support is collaboratively determined and monitored with all relevant stakeholders, including children/youth and caregivers.
Trauma-Responsive Referral Protocol	Referral protocol addresses a continuum of mental health supports for children/youth, including referrals to partnering organization(s) when appropriate.
Trauma-Responsive Transition and Reintegration Planning	Protocol for transition from alternative settings, such as a psychiatric residential treatment facility.

Check for Understanding

Conclusion

Describe the components around which District-Community Leadership Teams initially plan, using the implementation process.

Slide Deck

<https://www.ksdetasn.org/resources/2690>

Learning Objectives

- Articulate how ACEs can impact child/youth development.
- Identify practices to support children/youth's emotional regulation and foster resilience.
- Identify effective practices to enhance caregiver well-being.
