Which observation recording procedure did you use?

Event Recording

Use when you're counting instances of a behavior and when the behavior has a discrete beginning and ending.

[Select](#)

Download More Information:
[Frequency & Rate](#)

Interval Recording

Use for continuous behavior. Use for high rate behavior that is difficult to distinguish one response from another.

[Select](#)

Download More Information:
[Partial Interval Recording](#)
[Whole Interval Recording](#)
[Momentary Time Sampling](#)

Latency Recording

Use when you want to measure how long a student takes to begin performing a behavior once it's performance has been requested.

[Select](#)

Download More Information:
[Latency](#)

Duration Recording

Use when the primary concern is the length of time a student engages in a particular behavior.

[Select](#)

Download More Information:
[Cumulative Duration Recording](#)
[Average Duration Recording](#)

Not sure how to make this choice? [Click here for some further guidance.](#)
