

Paraprofessional Training

This is a resource of optional Paraprofessional training from various TASN projects and resources. Please review the options below and descriptions for each one.

Kansas Infinitec

- Infinitec offers a selection of videos for paraprofessional training and professional development. 230 of Kansas districts are members of the Kansas Infinitec Coalition, and have access to the list of these trainings on the below link. If you have questions about accessing these trainings as a member, or would like to become a member please contact Beth Zillinger at bzillinger@ucpnet.org.

TASN Autism and Tertiary Behavior Supports (ATBS)

- **Instructional Strategies** course is designed for paraeducators, special education teachers, general education teachers, or anyone providing direct instruction to students of all abilities. This course is approximately 20 hours long if all three sections are completed. Please visit the link for more information and how to access this course: <https://www.ksdetasn.org/atbs/instructional-strategies>
- **De-Escalation – Modules:** This course has ten modules to provide practitioners with a strong foundation to develop their understanding and professional skills in the area of de-escalation. These modules are helpful for many behavior issues and for interactions with all students. Please visit this link to access all of the modules: <https://www.ksdetasn.org/atbs/de-escalation-materials>
