

Evidence of Application:

Goal of Implementation:

Implement actions aligned to effective evidence-based practices.

Phases of Implementation:

- ❑ Precision Problem statement created using multiple sources of data.
- ❑ Evidence that multiple theories of causation across the six causal categories were considered and aligned to the precision problem statement.
- ❑ Evidence that actions were created based on theories of causation that were proven valid by data.
- ❑ Evidence marginalized groups were considered when examining data, making decisions, and creating actions. (Intentional representation and advocacy for groups of students.)
- ❑ Actions entered into KansaStar system.

Goal of Monitoring:

Measure the impact of the school's actions.

Phases of Monitoring:

- ❑ School and district co-create success criteria for actions
- ❑ Track the progress of implementing actions
- ❑ Monitor the success of actions during data consults
