## MOMENTARY INTERVAL RECORDING (Also known as Momentary Time Sampling)

Student Name: $\qquad$

Subject/Period: $\qquad$ Date(s):
Behavior Definition (in specific, observable, measurable terms):

Total Observation Time: $\qquad$ Length of each interval: $\qquad$

| Date | Interval \# |  |  |  |  |  |  |  |  |  | Total times behavior occurred (+) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |  |
| + or 0 |  |  |  |  |  |  |  |  |  |  |  |
| IOA: | (\# of agreements) |  | / $\qquad$ * $100=$ $\qquad$ \% IOA <br> Percent: |  |  |  |  |  |  |  |  |

| Date | Interval \# |  |  |  |  |  |  |  |  |  | Total times behavior occurred (+) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |  |
| + or 0 |  |  |  |  |  |  |  |  |  |  |  |
| IOA: $\frac{1}{\text { (\# of agreements) }} / \overline{\text { (total \# of trials) }}^{*} 100=\_\quad \% \mathrm{IOA}$ |  |  | / (total \# of trials) $\quad * 100=\ldots \%$ IOA $\quad$ Percent: |  |  |  |  |  |  |  |  |

| Date | Interval \# |  |  |  |  |  |  |  |  |  | Total times behavior occurred (+) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |  |
| + or 0 |  |  |  |  |  |  |  |  |  |  |  |
| IOA: $\qquad$ / $\qquad$ * 100 = $\qquad$ \% IOA <br> Percent: |  |  | / * 100 = $\qquad$ \% IOA |  |  |  |  |  |  |  |  |
