

2022-2023 Family Engagement Survey - Version 2
Report for Districts Participating in Kansas MTSS and Alignment Structuring and Implementation

The Family Engagement Survey, Version 2 (FES-2) asks families to provide feedback on the family engagement practices within their child’s schools. Families rate items on a scale from 1 (Strongly Disagree) to 5 (Strongly Agree). The following graph provides the 2022-2023 overall and average rating for each domain of the survey (Welcoming Environment, Effective Communication, Supporting Student Learning, Sharing Power and Advocacy, and Community Involvement) for all families in districts participating in Kansas MTSS and Alignment structuring and implementation that administered the survey (n=8,205). Families of children in these districts identified their child as being in one of the following subgroups: Students with an IEP (n=1,693), Non-white students (n=1,053), and students receiving free or reduced lunch rates (n=1,577). The graph includes representation from 32 districts.
